Jesus Beleno

Systems Engineer | Customer Success Engineer | Senior Support
Engineer | Technical Account Manager | Technical Support Engineer
| Backend Developer

Bogotá, Capital District, Colombia

Summary

Systems Engineer with over 5 years of experience, passionate about innovative technological solutions. I firmly believe that through AI-driven software, we will change the world and make it a better place. I excel in leadership, teamwork, and resilience. Keeping myself updated and learning from industry leaders, my skills include software development, AI, designing scalable systems, and providing support for startups. I am excellent at teamwork, problem-solving, and adapting to change. Hiring me adds solid technical knowledge and exceptional interpersonal skills to create effective and impactful solutions.

Experience

Twilio

Technical Support Engineer 2

April 2025 - Present (1 year 2 months)

Bogotá, Capital District, Colombia

- Exceptional Client Satisfaction: Maintained a 4.97/5 CSAT score by delivering high-touch technical guidance and ensuring seamless CDP implementation for enterprise-level clients. And the highest percentage of CSAT responses during 2026, reaching 26%.

- Technical Excellence: Consistently achieved a 99.6% Case Quality Review (CQR) rating, demonstrating mastery in data governance, identity resolution, and complex API integrations.

- AI-Driven Efficiency: Streamlined internal workflows by automating repetitive support tasks using AI tools, reducing manual triage time and increasing the team's capacity for high-priority technical escalations.

- Strategic Problem Solving: Resolved mission-critical technical bottlenecks, directly improving client Time-to-Value (TTV) and ensuring the integrity of downstream data activations.

- Cross-Functional Leadership: Partnered with Product and Engineering teams to translate complex customer friction points into actionable product enhancements and bug fixes.

Simetrik

Technical Support Engineer

July 2024 - April 2025 (10 months)

Bogotá, Capital District, Colombia

- Resolve Critical and Complex Incidents: Handle and resolve advanced technical issues that exceed the capabilities of lower support levels.

- Root Cause Analysis (RCA): Conduct in-depth investigations to identify the root cause of recurring or critical incidents.

- Collaborate with Development Teams: Work closely with software development teams to diagnose and resolve code-related issues.

- Mentorship and Training: Provide guidance and training to Level 1 and Level 2 support engineers to enhance their technical skills.

- Process Optimization: Contribute to the improvement of support processes, including automation, documentation, and best practices implementation.

Instaleap

2 years 1 month

Senior Support Engineer & Backend Developer

March 2022 - March 2023 (1 year 1 month)

Bogotá, Capital District, Colombia

- Integrated the internal tools team responsible for developing cross-functional internal software solutions company-wide.

- Collaborated with multifunctional teams to identify and resolve complex technical issues, achieving a 20% reduction in system downtime.

- Contributed to the development of the first version of an artificial intelligence system for proactive incident detection, improving the support team's operational efficiency by 25%.
- Assisted in defining the architecture and framework used to create the internal tools API.

Semi Senior Support Engineer

March 2021 - April 2022 (1 year 2 months)

Bogotá, Distrito Capital, Colombia

- Resolved 35% more incidents on first contact by improving diagnostic and documentation processes, increasing support efficiency and customer satisfaction.
- Developed automated scripts in Node.js for repetitive support tasks, reducing problem resolution time by 20%.
Collaborated with the development team to debug and fix critical back-end errors, enhancing system stability and performance.
- Participated in training and mentoring new support team members, sharing best practices and advanced problem-solving techniques.

Tory Technologies, Inc.

Project And Support Engineer

October 2019 - March 2021 (1 year 6 months)

Bogotá, Distrito Capital, Colombia

- Developed custom reports using Crystal Reports and Excel, providing detailed data analysis and facilitating decision-making.
- Contributed to software development using Angular, working closely with the development team to create intuitive and functional user interfaces.
- Managed system integration projects, ensuring smooth transitions and improved interoperability between platforms, reducing integration errors by 30%.

APG Consulting

Business Intelligence Developer

May 2019 - October 2019 (6 months)

Bogotá, Distrito Capital, Colombia

Minute of God University
System Engineering Intern
February 2019 - May 2019 (4 months)
Bogotá, Distrito Capital, Colombia

I provided support functions in the training area, mainly in the implementation of Microsoft Office 365 office tools among university employees and students.
